

Shining Star of the Month

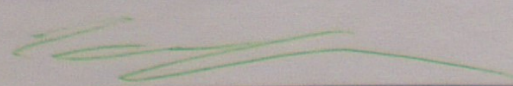

Awarded to

Andreas Isaksen

Andreas is a great part of the NP UA team, he has great attitude towards work and has shown interest in learning more and taking on new responsibilities.

In busy month of January Andreas has been working very hard to get the backlog down, especially the mailbox for Norwegian mainframe. Andreas took ownership of the mailbox as well as all the hard Jazz tasks and handled all requests very efficiently at the same time as he provided training for other team members and worked with the IMKD review project. Andreas always has a smile on his face which makes him very appreciated by all team members.
